

BP-Control® Whitepaper

Business Process Control

takes your
ideas home...

Function

BP-Control® is designed to visualise, appraise and communicate your business processes. On the basis of a preassigned graphical structuring- and appraisal schema you can very easily gather and make up all of your relevant data.

Concerning the outstanding web graphics platform you can memorably communicate and trace all of your relevant business processes and its correlations.

We offer substantial options for interaction available by the use of state of the art database technology:

- Searching
- Data Input and gathering, visualisation and formula evaluations
- Annotations
- Comparison lists
- Snapshots and time series
- Calendar functionality and e-mail notification
- Multilingualism support

Customer Benefit

Business processes are an indispensable part to every organisation. Without analysis and striking communication chaos rules and unnecessary repeated tasks slows down your workflow.

Using BP-Control® you **keep track** about your relevant business processes in every field and responsibility with all of its projects and tasks, dates and limits.

At the same time using BP-Control® you **achieve** a continuous business processes optimization, because every data become stored in an analysable manner and you can combine and compare them at any time.

By the graphical visualisation you get a really quick overview about complexity and details. And by the potentials of interactions every coherences become clearly cognizable and easy to communicate. The underlying object oriented schema ensures that your business processes become consistent, comparable and easy-to-handle.

The possibilities of instant integration with the other modules of the tool called mem-topics® from memeticor® offers a unprecedented consistence of strategic targets, ideas, chances and risks, business processes, technical documentation towards problem management and e-learning – the big picture of „soft-facts“.

Win your headstart using Problem BP-Control®!

Technology

BP-Control® is based on the tool mem-topics® from memeticor®, an universal web tool. The technology behind is the object-relational database Cache® from Intersystems®.

The graphics is based on the XML based international standard SVG (Scalable Vector Graphics).

All you need is a server running Windows (XP, 2000) or Unix (Linux, etc.) and a client running Microsoft® Internet Explorer® (version 6 or higher) and the free available Adobe® SVG Viewer (version 3.0 or higher).

You may use the instant integration to the other modules of the tools mem-topics® from memeticor®, and you have easy but powerful possibilities of integration by the used architectur (SOAP, ODBC, Java, .NET, SAP, etc.).
