Function

IT SSS Check® is designed to visualise, appraise and communicate the use of information technology. On the basis of a preassigned graphical structuring- and appraisal schema you can very easily gather and make up all of your relevant data.

Concerning the outstanding web graphics platform you can memorably communicate and trace all of your relevant it proceses, projects and inventory and its correlations.

We offer substantial options for interaction available by the use of state of the art database technology:

- Searching
- Data Input and gathering, visualisation and formula evaluations
- Annotations
- Comparison lists
- Snapshots and time series
- Calendar functionality and e-mail notification
- Multilingualism support

Customer Benefit

IT is an indispensable part to every organisation. In many cases your organisations rely on requirements of the IT in terms of processes and transaction limits. Our information society pushes the envelope of pack of data, transaction speed and security.

Using IT SSS Check® you **keep track** of all IT issues and you can appraise costs, security and sense.

At the same time using IT SSS Check® you **achieve** a continuous handling of IT projects, because every data become stored in an analysable manner and you can combine and compare them at any time.

By the graphical visualisation you get a really quick overview about complexity and details. And by the potentials of interactions every coherences become clearly cognizable and easy to communicate. The underlying object oriented schema ensures that your it proceses, projects and inventory become consistent, comparable and easy-to-handle.

The possibilities of instant integration with the other modules of the tool called mem-topics® from memeticor® offers a unprecedented consistence of strategic targets, ideas, chances and risiks, business processes, technical documentation towards problem management and e-learning – the big picture of „soft-facts“.

Win your headstart using IT SSS Check®!

Technology

IT SSS Check® is based on the tool mem-topics® from memeticor®, an universal web tool. The technology behind is the object-relational database Cache® from Intersystems®.

The graphics is based on the XML based international standard SVG (Scalable Vector Graphics).

All you need is a server running Windows (XP, 2000) or Unix (Linux, etc.) and a client running Microsoft® Internet Explorer® (version 6 or higher) and the free available Adobe® SVG Viewer (version 3.0 or higher).

You may use the instant integration to the other modules of the tools mem-topics® from memeticor®, and you have easy but powerful possibilities of integration by the used architectur (SOAP, ODBC, Java, .NET, SAP, etc.).
