

# ReadyToGo-Consulting® Whitepaper

makes consulting  
services  
sustainable...

## Design Applications without Programming

### Function

Our consulting concept ReadyToGo-Consulting® shall help to make consulting services sustainable and practical by use of software. We know that only process oriented procedures will succeed in the long run, whether by internal experts at the customer's side and/or by external consultants.

Our aim is to achieve together with users, consultants and other software manufacturer that

- software helps to get valuable information back from the application to learn about the chosen consulting concept and that
- consulting concepts may directly be used for functional applications at the customer's side.

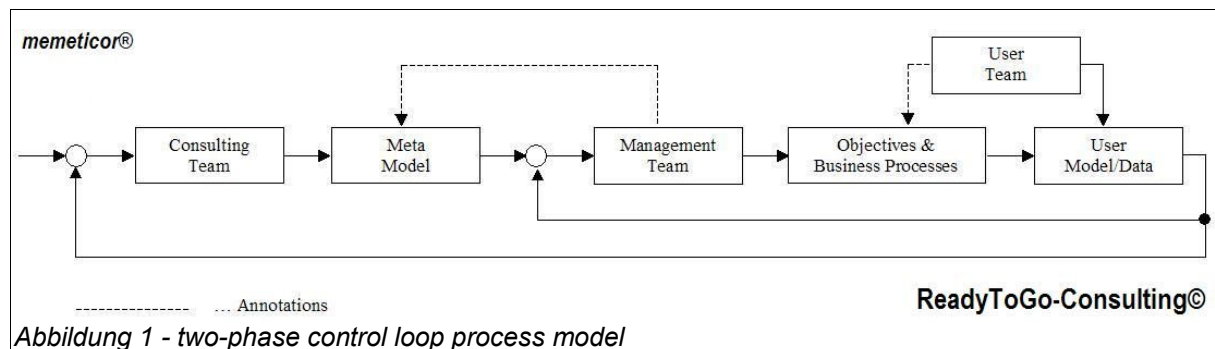

Abbildung 1 - two-phase control loop process model

Our own software therefore has the following features:

- import/export functionality for datenmodels
- importe/export functionality for style libraries
- import/export functionality for mass data
- import/export functionality for contents
- context sensitive tips und tricks from your Consultant by NavigationTipGuide®
- moderation for brainstorming, voting and cloning
- snapshots, time series and comparison lists
- annotations for communication about the datenmodel and the content
- various reporting and analysis facilities
- conception and configuration via web browser

### Customer Pros

- "made-to-measure" and "adaptable" solutions
- theory = practice
- sustainable consulting services

### Consultant Pros

- learning about the approach (the model)
- feed-back from end-users
- "teach-in" system

### Tool Pros

- applications and consulting concepts in one consistent tool
- enhanced communication channels (Consultant - Management - User)
- applicable in many cases

Win your headstart using ReadyToGo-Consulting®!
