ASK ALSO FOR COMBINATION WITH TIME TRAVELS© !

You can pick from an embarrassment of riches, you have unlimited good ideas. You could also find suitable structures to sort them and to interlink them. The vision is present, you feel intuitively what power is in there. But you miss that certain something to get the vision loping. Now it is time for harvest. It its coming to do the right trim for things. Water has to condense again. Intuition has to become Intention. Mission, targets and values must be in harmony. Can everybody follow you and your vision ? What's about a proof of concept ? When was your last time travel ? When was your last I.P.O. ?
